SUMMARY

Final-year Software Engineering graduate from FPT University with a foundation in computer networking, IT support, and system administration. Hands-on experience in backend development using .NET and ASP.NET Core. Eager to develop a career in IT Support, Helpdesk, and IT Administration, with a proactive attitude, strong problem-solving skills, and willingness to learn new technologies.

WORK EXPERIENCE

Backend Developer Intern **FPT Software Academy | September 2025 – November 2025**

- Participated in the development of a Fertility Treatment Management System as part of a 5-member development team.
- Developed backend APIs for key modules, including Account/IAM, Patient Management, Medicine Management, Booking Workflow, and Inventory Management.
- Worked with a Microservices Architecture to organize backend services and support independent module development.
- Integrated gRPC for inter-service communication and RabbitMQ for message-based communication.
- Implemented image upload and storage functionality using AWS S3.
- Collaborated with team members to develop and integrate backend functionalities throughout the project.
- Technologies: .NET, ASP.NET Core, Microservices Architecture, RESTful API, gRPC, RabbitMQ, AWS S3.

Aura – University Startup Simulation Project **FPT University | April 2026 – August 2026**

- Designed and developed the backend system and database architecture using .NET and ASP.NET Core REST APIs.
- Integrated Google Gemini 2.5 Flash for AI-powered image analysis, achievement evaluation, and personalized user encouragement.
- Developed an AI-powered chatbot using Gemini to assist users and provide personalized support.
- Implemented CRUD functionalities for achievements, badges, levels, and user-generated posts.
- Integrated Firebase Authentication and Google Sign-In for user authentication and account management.
- Implemented image and video upload functionalities using Google Cloud Firebase services.
- Collaborated on Flutter UI development using Lovable and supported APK deployment.
- Configured Jenkins for backend deployment and delivery automation.
- Technologies: .NET, ASP.NET Core, REST API, Database Design, Google Gemini 2.5 Flash, Firebase, Google Sign-In, Flutter, Jenkins.

EDUCATION

FPT University – Ho Chi Minh City Campus

- Bachelor of Software Engineering
- Graduated: February 2026

PROJECTS

Full-Stack Developer (Solo Project) **September 2026 - October 2026**

- TikTok Live Tools | Personal Project
- Designed and developed a backend API using ASP.NET Core to support TikTok LIVE interaction features.
- Integrated TikTok LIVE EventBridge to receive and process live-streaming events.
- Integrated Google Gemini AI via Google AI Studio to generate context-aware, AI-powered responses.
- Developed the frontend interface using ReactJS and integrated it with the backend API.
- Independently handled the project lifecycle, including backend development, AI integration, frontend implementation, and system integration.
- **Tech Stack:** ASP.NET Core, REST API, ReactJS, Google Gemini AI, TikTok LIVE EventBridge.

LiBot – Smart Library Robot Management System **September 2026 - December 2026**
Academic Capstone Project | Team of 5

- Developed RESTful APIs for core library management modules, including Account Management, Book Management, Borrowing, and Returning.
- Implemented library map management functionality to connect library location data with the autonomous robot.
- Designed an extensible Step Type architecture to define robot actions such as MOVE and SCAN, allowing new action types to be added in the future.
- Applied Clean Architecture to organize backend components and improve maintainability and scalability.
- Collaborated with team members to integrate backend services with the autonomous robot system.
- **Tech Stack**: .NET 10, ASP.NET Core, RESTful API, Entity Framework Core, Clean Architecture, SQL Server, IOT.

SKILLS

- **IT Infrastructure:** Networking, IT Helpdesk, IT Support, Windows Server (Basic).
- **Backend:** C#, .NET, ASP.NET Core, RESTful API, Entity Framework Core, Microservices.
- **Database & Cloud:** SQL Server, PostgreSQL, Firebase, AWS S3.
- **DevOps:** Docker, Jenkins.
- **Frontend:** HTML, CSS, JavaScript, ReactJS.
- **Mobile:** Flutter.
- **Messaging & Communication:** gRPC, RabbitMQ.
